

Department of Mining Engineering

Announcements

- Spring break March 12-19
- Finals week April 27- May 03
- Don't forget to meet with your faculty advisor and get on a path to graduate.
- Registration for Fall 2017 classes begin April 10th.

Additional Info/Announcement

- Submit PDF copies of your receipts from SME to hoefler.erich@gmail.com by March 9th at Midnight
- Mining Engineering banquet Tuesday, April 18th from 6-9pm. Watch for your invitation in the next couple of weeks.
- Its not to late to get an internship! See the Seminar announcements from Professor Wempen for more details.
- Interested in being an SME officer next year? If so, email kboycemining@outlook.com.
- If you've received an internship or a full time job, let Brad Munns (brad.utah2015@gmail.com) know to spotlight you in the newsletters.
- New to the department? Its not too late for a mentor to help! Contact Kyle Spaulding at kylespaulding7@gmail.com for more info.
- Send proof of boot point activities to Jacob Frei at jcfreister@gmail.com.
- Have a suggestion for the Mining Engineering Department? See your SAC officers and get your voice heard!

Student Spotlights

My name is Jake Frei. I am a junior in the program. I enjoy playing rugby, riding horses on my uncle's ranch, hanging out with my brothers, and doing anything that has to do with mining. Ever since I was a little kid I have been fascinated with mining, especially the equipment. By the time I was two, I knew the names of all the earth moving equipment. I interned at Tronox Alkali last summer and did a ton of surveying and really enjoyed it.

My name is Conner Fahringer. I am a transfer student here, and have just moved in August from California but am originally from Canada. In my free time I enjoy skiing, hiking, and just generally being outdoors. I am also a private pilot.

I got into mining because I found most other engineering disciplines involved being stuck in some office in a city, and after an internship at an Aerospace firm decided that was not right for me. Mining allows me the ability to (hopefully) spend more time in the field, and also to blow things up!

internships and full time offers

- **Kyle Spaulding (Intern): Freeport McMoRan (Miami)**
