- Pass your Final Exams!!!
- Watch for more interview sign ups

Final Week Here We Come

What an exciting week we have coming up! I am sure that everyone has plenty of to keep themselves busy for the rest of this week and next week. As projects and finals finish up and some free time opens up we have a few projects that we could use your help on.

As a Student SME Chapter we are will be nominating John Reeves for the Mining Hall of Fame. For those of you that don't know him he is the gentlemen that invites us to his house and then pays for us to go to the Mining Hall of Fame Dinner. If anyone is interested in helping with this nomination please contact me.

We have received a request from the Morenci SME Student chapter to come up with a list of trivia questions for an activity that they are having. Listed below are the trivia categories they have suggested. There is a \$200 reward to the student chapter that submits the best list of trivia question

We would like to thank Wheeler Machinery for a **\$1,000 donation** and Murray Energy for a **\$500 donation!**

As a final note we are working closely with ASUU to help make the SME Denver Conference trip as affordable and convenient as possible. In order to do this **if you plan on going please register for the conference and have the receipt to Pam by Dec 12** so that we can put a bill together for ASUU.

Thank you,

Olan Nielson
SME Vice President

- Mineral Processing – Comminution, Floatation, Solvent Extraction, Hydrometallurgy

Mining Spotlight

Left : Casey Cloward

Right: Andrew Austin

Casey Cloward

I was born and raised in Mapleton, UT. I originally went to school a CEU for criminal justice half way through was redirected by family to pursue an engineering degree. Being intrigued by the opportunities of employment and financial aid I chose the mining department here at the U.

Andrew Austin

I'm Andrew Austin, usually Mark on the roll call. I am a sophomore in the program, from Eagle Mountain Utah. Love being outdoors camping and hiking, big fan of downhill biking, I guess that's why I got into mining, get to be outside all the time. Loving the people in the program, school itself, not so much haha.

ARMA/SPE Trip to TerraTek
